The industry's brightest, lightest
and most powerful 1DLP projector

CHRISTIE®

Christie H Series

The Christie® H Series combines high-brightness with excellent color reproduction and boasts 12,000 lumens. With superior image quality, flexible connectivity and less than half the noise of competitive products, the Christie H Series packs a lot of high-performance features into a surprisingly small and sleek package.

Best-in-class brightness

Christie D12WU-H
WUXGA – 12,000 center lumens

Christie D12HD-H
HD – 11,000 center lumens

Small, but mighty

Meet the 1DLP projector of your rental staging dreams

The Christie H Series is designed to bridge the gap between mid-sized and large venues, giving you an excellent option at an affordable price.

Enhance your projection solutions offering with the Christie H Series. With a black chassis and half the noise of the competition, it's perfect for discrete installations. The lightweight and sleek profile makes it easy to handle and ship, costing you less money with each installation. Plus, the available stacking and rigging frame, portrait capability, and advanced warping and blending capabilities give you the design freedom you crave.

The Christie H Series also features a full suite of lens options and compatibility with Christie E Series lenses, making it a cost-effective and flexible solution.

▲ Rigging/stacking frame – portrait orientation

Hush.

Listen closely. Do you hear it?

It's the impossibly quiet Christie H Series. If you're dealing with mid-sized to large venues, this is the one you've been waiting for.

The Christie H Series boasts half the noise of competitors, the highest 1DLP brightness in the industry and it's easy on the eyes, too. Experience the best of both worlds with high-brightness and color integrity, all in one affordable projection solution. Balancing bright, vivid images with a sleek, elegant design, the Christie H Series blends into any environment to let image performance take center-stage.

Ideal for discrete installs, the available ceiling mount, extender rod and rigging clamp ensure a smooth installation process. Plus, with an input panel cover plate and bottom-side HDMI input connection to hide unsightly cords, and a choice between white and black models to suit your environment, the focus is all on the color-rich images you'll have on display.

▲ Second HDMI connector on the bottom of projector

Designed for performance

▲ 360 degree projection

Blending and warping capabilities

Blending and warping are easy with the new Christie® H Series software and the use of off-the-shelf standard cameras¹. The software and camera option allow for easy and quick edge-blending and stacking capabilities with advanced grid control for more complicated, finite correction. You can also use the software to setup multiple projectors for warping images (advanced geometry correction) or for multi-projector blending to create large panoramic seamless displays.

3D capability

Add an edge to boardroom meetings or lecture hall presentations with consumer-grade 3D capability. Utilizing either HDMI or HDBaseT™ inputs, the Christie H Series has an output of up to 120Hz and includes frame packing, side-by-side and top/bottom 3D capabilities built right in.

Portrait mode and 360 degree projection

Projectors can be used in portrait orientation using existing lamps², reducing your set-up time and minimizing extra costs for special lamps. They can also be installed in a 360 degree configuration.

Enhanced lamp options

Dual-lamp design lets you maximize brightness or extend lamp life. Lamp life is 1500 hours typical @ 465W and 2000 hours typical @ 370W.

Digital Imaging and Communication in Medical (DICOM) simulation

DICOM simulation mode provides enhanced grey scale levels for medical training³ applications requiring DICOM part 14 specifications.

▲ Standard mode

▲ DICOM simulation mode

▲ Input panel

Connectivity

The Christie H Series uses HDBaseT to provide the latest in intelligent and flexible connectivity, by allowing for both video content and control to be delivered over low cost CAT5/6e cabling.

3G SDI enables video integrity over long distances. A second RJ-45 input enables dedicated control of the projector if required.

An additional second HDMI connector on the bottom of the chassis provides clean, discrete installations with no visible cables.

¹ Logitech HD Pro Webcam C920 is the recommended model.

² Reduced lamp life.

³ Simulation mode is for training purposes only, not for medical diagnostics of actual patients.

Variety of lens options to choose from

A full suite of lenses, including an adapter for the Christie E Series lenses ensures design freedom and flexibility for installation.

Lens options⁴

Description	Part number
0.84-1.02:1 zoom lens*	140-114107-01
1.02-1.36:1 zoom lens*	140-115108-01
1.2-1.5:1 zoom lens (Full ILS)	140-109101-01
1.5-2.0:1 zoom lens (Full ILS)	140-110103-01
2.0-4.0:1 zoom lens (Full ILS)	140-111104-01
